- Enterprise Data & Analytics Platforms
- Global Operating Models
- P&L Management & Accountability
- Technology Governance
- Portfolio Ownership
- Budget & Vendor Management
- Executive Stakeholder Engagement
- Organization Design & Team Scaling
- Business Value Realization

## WORK EXPERIENCE

### EPAM SYSTEMS DANONE

Feb 2025 - Present

#### Program Manager - Data and Analytics

- Owned a strategic, enterprise-wide program to industrialize the delivery of high-value data products on Danone's Databricks Lakehouse, orchestrating global business units and multiple delivery partners across markets.
- Defined and enforced the operating model, governance, and financial framework to shift Data & Analytics to a pay-per-use, use-case-led model, materially reducing TCO while increasing cost transparency and investment accountability.

### EPAM SYSTEMS SONEPAR

Dec 2020 - Jan 2025

#### Data Platform Lead - Acting Head of Data & AI

- Reporting to Sonepar VP of data & AI, owned the delivery and evolution of Sonepar's global data platform across 20+ countries, partnering with global and regional business leaders, data leadership, and executive sponsors.
- Designed and implemented the global operating model, governance, and delivery standards aligning commercial strategy with technology execution.
- Delivered data monetization programs enabling new revenue streams by commercializing analytics insights to key suppliers to improve their commercial performance.
- Delivered AI-driven churn detection products contributing to approximately 5% churn reduction across targeted business segments.
- Introduced NLP-based "talk-to-your-data" AI solutions, significantly increasing data democratization and adoption of self-service analytics across the Sonepar.

### EPAM SYSTEMS ACCELYA

Jan 2019 - Nov 2020

#### Delivery Manager - Platform Modernisation

- Led incremental modernization of BSPlink, IATA's global settlement platform, enabling faster delivery of new business capabilities while avoiding a high-risk big-bang migration.
- Reduced delivery and operational risk for a mission-critical financial system through phased rollout and strengthened platform architecture.

### EPAM SYSTEMS PRIVALIA

Oct 2017 - Dec 2018

#### Delivery Manager - Digital Commerce Platform

- Led transformation of Privalia's commerce platform, enabling marketplace capabilities and improved UX, contributing to ~25% conversion rate increase.
- Coordinated 120+ engineers across multiple hubs, partnering with CTO and CPO to accelerate platform scalability and feature delivery.

### DMI INC.

#### ART BASEL

Oct 2015 – Sept 2017

### THOMSON

#### REUTERS

#### IP & LIFE SCIENCES

May 2014 – Oct 2015

### CIRSA INTERACTIVE

Sept 2002 – May 2014

### Project Manager – Head of Project Management

- Led the delivery of a multi-channel digital engagement ecosystem for Art Basel, integrating web, mobile, and on-site digital experiences to seamlessly connect artists, galleries, and visitors across physical and digital touchpoints, strengthening audience engagement and event experience at scale.
- Supported the professional development of Project Managers and Delivery Leads, sharing best practices in delivery management, client engagement, and agile leadership. Acted as a role model in promoting accountability and continuous improvement.

### Technology Program Manager

- Led a \$5M technology program portfolio for Thomson Reuters IP & Life Sciences, driving roadmap definition, delivery governance, and financial control in close partnership with Product and senior stakeholders.

### Software Engineer | Project Manager

- Advanced from engineering to project leadership, delivering international strategic programs supporting CIRSA's global growth.
- Launched Internet Instant Lottery platform in South Korea, integrating 20 halls and 500 terminals.

## EDUCATION

### Master in Project Management

La Salle Business School (2012) – Best in Class

### MSc Computer Engineering

Universitat Politècnica de Catalunya (1995–2001)

## PERSONAL RESEARCH

### ProspectAI – Agentic AI Investment Platform

GitHub: <https://github.com/moisesprat/ProspectAI>

- Conducted applied research on agentic AI architectures, designing and implementing a multi-agent system using for autonomous market research, risk analysis, and portfolio construction.
- Explored agent collaboration and decision orchestration patterns aligned with real-world investment governance models.
- Demonstrates the ability to translate emerging AI paradigms into business-relevant, decision-oriented technology solutions.

## LEADERSHIP ATTRIBUTES

### IRONMAN Triathlete

Evidence of resilience, discipline, and sustained high-performance mindset; qualities directly transferable to leadership roles.
